

Smart Multi-room Audio & Lighting

Touch Screen

The Hamilton Touch Screen offers additional features to control the Lighting control and Multi-room Audio systems. It can be connected to a Lighting System using a Touch Screen Interface (available from Hamilton) or can be connected directly to the MRA4 Multi-Room Audio System which is connected to your Lighting System via its RS232 interface.

The Touch Screen acts as a master switch and is particularly useful for commercial installations, as it allows all connected circuits to be controlled from one place. Up to 3 Rooms, 16 circuits per room. The Touch Screen is designed to enable users to customise their Hamilton Lighting Control and Audio Systems, it allows you to rename Audio Zones / Audio Sources / Lighting Zones and Lighting Scenes.

SYSTEM FEATURES:
